

Summary

635

Words Tapped

28

Different Words

25 of 31

Days with Use

301

Messages Spoken

Every tap on a word counts, including taps later removed and taps by an adult who is not in Modeling Mode.

About These Numbers, at the end, says what each figure counts and leaves out.

Vocabulary Coverage

Home board

13 of 35 words used (37%)

● Action 5 of 7

● Describing 3 of 7

● Social 2 of 4

● Question 1 of 3

● Person 2 of 9

● Where 0 of 5

Other boards

14 of 2,480 words used (1%)

The home board and other boards are counted apart, so adding a board never lowers the home board figure. Hidden words, folders and phrase buttons are not counted.

Language Measures

Mean words per message 1.9

Longest message 4 words

Two-Word Messages 219

Phrase Buttons Spoken 26

New Words 0

Taps per Minute 3.3

Runs of use 52

Time of day Morning 51% · Afternoon 30% · Evening 19%

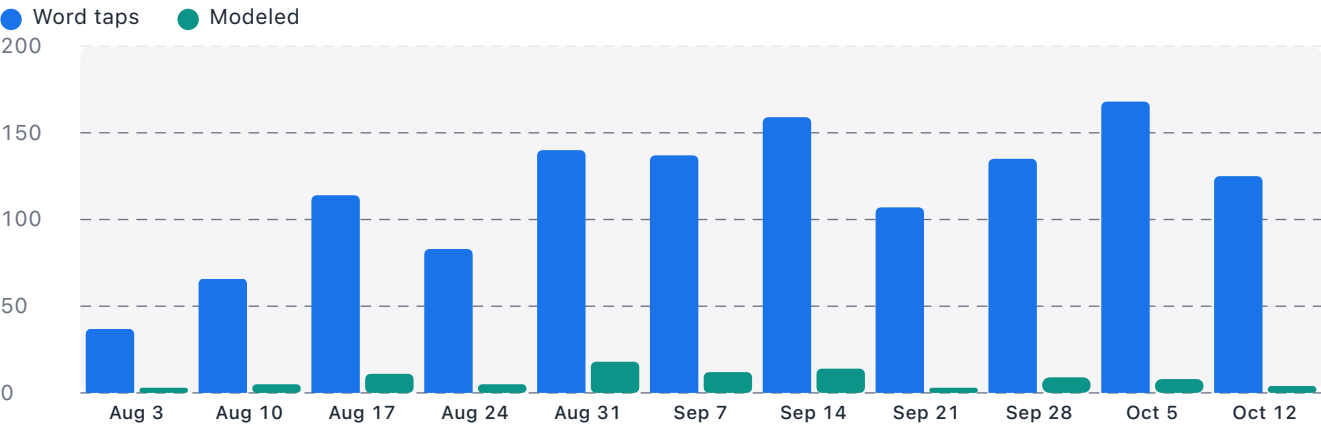

Previous 31 days 533 words, 28 different

A run of use ends after two minutes without a tap.

Taps per minute is measured within runs of taps with no gap over two minutes.

Excludes 32 taps made in Modeling Mode.

Weekly Trend

Word taps by week, with the words modeled in Modeling Mode. The last week is to date.

Goals

Uses two-word messages at snack and play

Criterion: At least 5 independent uses in 3 sessions in a row

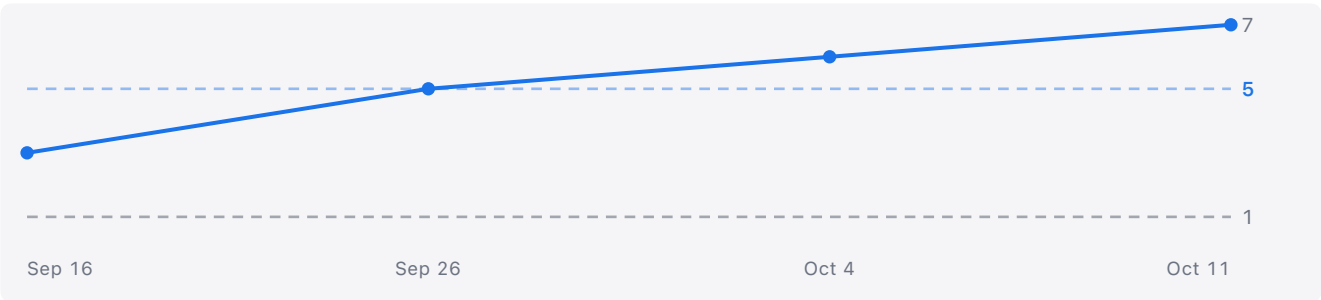

Baseline: 1

Status: Active

Latest: 7

[Criterion met](#)

21 independent, 4 prompted, 0 modeled · After a pause 4

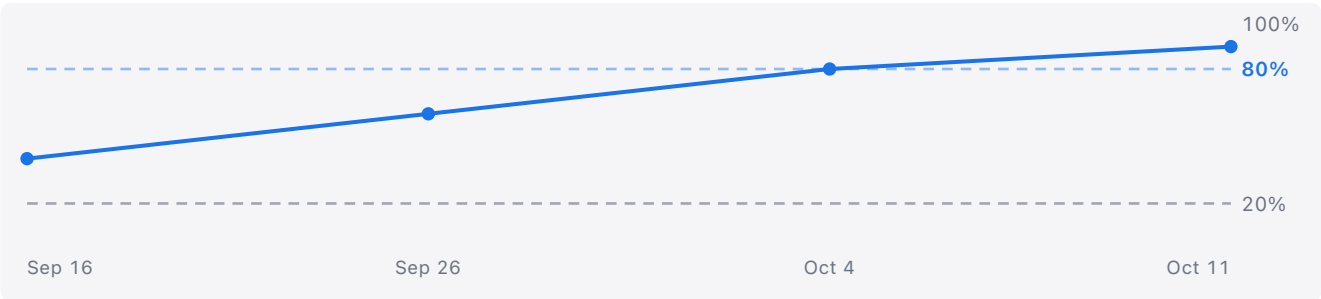

Date	Setting	Staff	Counts	Opportunities	Result
Sep 16, 2026	snack	Ms Patel	3 independent, 1 prompted, 0 modeled		3
Sep 26, 2026	snack	Ms Patel	5 independent, 1 prompted, 0 modeled		5
Oct 4, 2026	snack	Ms Patel	6 independent, 1 prompted, 0 modeled		6
Oct 11, 2026	snack	Ms Patel	7 independent, 1 prompted, 0 modeled		7

Requests more and help during snack

Criterion: At least 80% independent in 3 sessions in a row
Baseline: 20%
Status: Active
Latest: 90%
Sessions in a row at criterion: 1 of 3

Latest session not counted toward the criterion: 2 uses not reviewed.
27 independent, 10 prompted, 6 modeled, 2 not reviewed · After a pause 7, Gesture or cue 2, After a model 1

Date	Setting	Staff	Counts	Opportunities	Result
Sep 16, 2026	snack	Ms Patel	4 independent, 4 prompted, 2 modeled	10	40%
Sep 26, 2026	snack	Ms Patel	6 independent, 3 prompted, 2 modeled	10	60%
Oct 4, 2026	snack	Ms Patel	8 independent, 2 prompted, 1 modeled	10	80%
Oct 11, 2026	snack	Ms Patel	9 independent, 1 prompted, 1 modeled, 2 not reviewed	10	90%

Repairs a breakdown by trying another word

Criterion: At least 3 independent uses in 2 sessions in a row
Status: Active
Sessions in a row at criterion: 0 of 2
No sessions yet

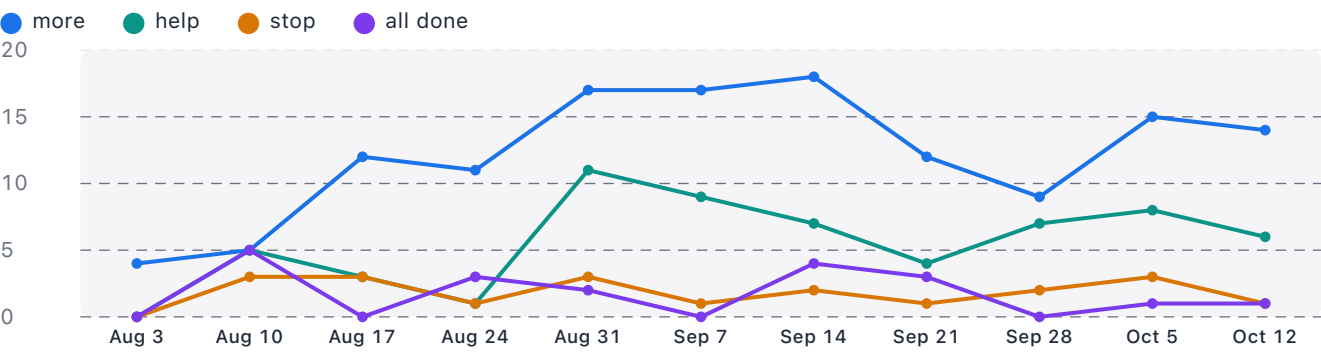

Not reviewed: uses staff did not give a support level. They count toward nothing, and a session with any does not count toward the criterion.

Target Words

more	60 times
help	29 times
stop	9 times
all done	9 times

Every tap of the word in the period, whatever support it needed.

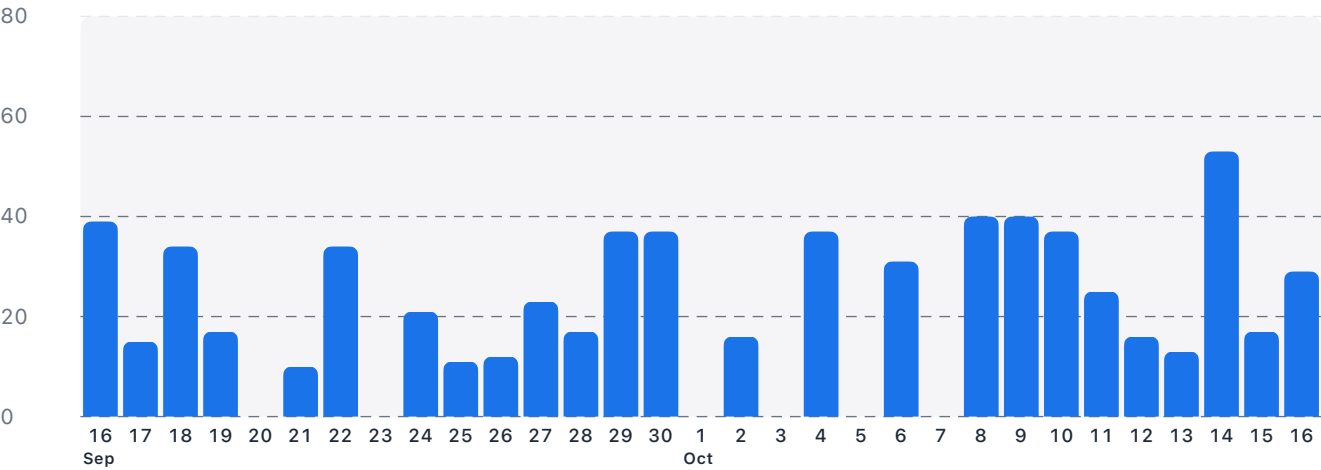

Target words by week

Most Used Words

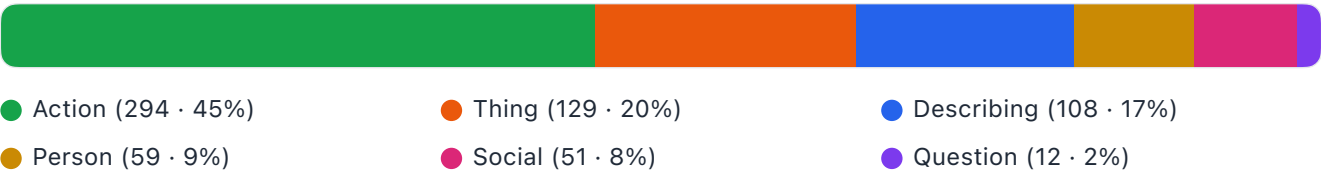

1	want	146
2	more	60
3	I	45
4	help	29
5	play	28
6	bubbles	22
7	milk	20
8	dad	20
9	go	20
10	drink	19

Daily Activity

Days without a bar had no recorded taps. Recording may have been paused.

Word Categories

Every tap, by color group.

Notes

Sep 26, 2026

Snack time with the class. Ada asked for more crackers twice without a prompt and used help when the lid was stuck. Next: wait longer before offering the model.

Oct 4, 2026

Speech room. Modeled want + noun through the whole session. Two-word combinations are starting to come on their own.

Oct 13, 2026

Home report from Mom: used all done at bath time, first time outside school.

About These Numbers

Word taps: every time a word is added to the message bar, including taps later removed. An adult's taps count unless Modeling Mode is on, so turn it on when you tap for them.

Modeled: taps made in Modeling Mode, the adult showing words on the device. They are never counted as the child's.

Messages: what was spoken with the Speak button, one word or many. A phrase button speaks a pre-built message with one tap and is counted on its own line.

Runs of use: taps with no gap over two minutes, a rough count of how often the device was picked up. Taps per minute is measured inside them.

Coverage: words on the boards the child used at least once in the period. The home board holds the core words.

Goals: measured in data sessions that staff review afterwards, giving each use the most support it needed. A use nobody reviewed counts toward nothing, and a session with any left does not count toward the criterion.

None of these numbers measures understanding or what a message meant. Goals and notes carry that.
